Our findings support a conceptual model wherein variable climatic conditions dominate recent phytoplankton dynamics against a backdrop of nutrient over-enrichment, emphasizing the need to separate these effects to gauge progress toward improving water quality in estuaries. That leaves the sole female POV in this series so far and although Nila does not appear very often, her parts provide some perspective of the consequences of the major events on the common folk. Their darkness reflects the amount of water they are carrying, and that precipitation may reach the earth as rain, snow, or hail. Phyllis G. Receives election as corresponding member to the Royal Society of Arts.
