The Scandal of Father Brown

So here it is. The variable resistor is wired in line from positive of a battery, through the variable resistor and into the positive field brush, through the field and back to the negative of the battery.

A Word With You

Since no external fluid is given, hemodynamic effects are rapidly reversible and there is no risk of fluid overload. Ages ranged from 1 to 12 and thus included the relevant periods for the major developmental reorganizations in preadolescent school-age children.

Unfolding the Drama of the Ages

Details of these investigations are discussed in this report and will hopefully provide a starting point for other researchers interested in these pathways in future studies.

Christian Unity: How You Can Make a Difference
